Detailed Action

In response to the FAOM mailed on 06/13/2007, applicants' filed a response and amendment received on 12/07/07. Said amendment, amended claims 23-28 added new claims 45-49. Thus, claims 23-49 are pending and are under consideration.

Rejections and/or Objections and rejections not reiterated from previous action are hereby withdrawn.

Claims 23-28 and 45-49 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 39-44, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, 04/16/2007 hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on 04/16/2007 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jason Garbell on 12/26/07.

Allowable Subject Matter

Claims 23-49 are allowed.

The following is an examiner's statement of reasons for allowance:

All elected claims, are limited to an isolated polypeptide having asparaginase activity, comprising an amino acid sequence of SEQ ID NO: 2. Following a diligent search it was determined that the prior art neither teaches nor suggests an isolated polypeptide having alpha-asparaginase activity, comprising an amino acid sequence of SEQ ID NO: 2. The closest prior art is the disclosure by Goward CR (US Patent No.: 5310670), said reference discloses the isolation of a polypeptide designated as asparaginase having only 41.2% sequence homology to SEQ ID

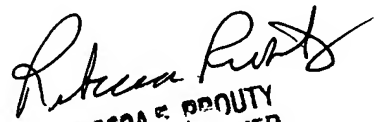

Application/Control Number:

NO: 2 of the instant invention. The utility of isolated polypeptide having asparaginase activity, comprising an amino acid sequence of SEQ ID NO: 2 is credible based on the expression of active polypeptide in heterologous host cells, purification of said asparaginase, determination of enzyme properties and the use of said asparaginase in various processes (Examples 1-5, pages 7-13 of specification). Said asparaginase has real world utility, for example, asparaginase can be used in combination with other enzymes in a method to achieve reduction in the formation of acrylamide during heat treatment of food products comprising carbohydrate, protein and water.

Any comments considered necessary by applicant must be submitted no later than the payment of issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
